ABOUT ME

Summary

- Computer Science and Engineering graduate with a strong foundation in software development, problem-solving and web technologies. Experienced in both backend and full-stack development. Passionate about building scalable applications and continuously learning new technologies. Looking for an opportunity to contribute to innovative projects.

Strength

- Proficient in competitive programming and algorithmic problem-solving.
- Well-versed in Object-Oriented Programming (OOP), with strong skills in designing modular, reusable, and maintainable code.
- Experienced in building dynamic web applications using Django and Spring Boot.
- Designed and implemented scalable REST APIs with Express.js and Node.js.
- Fetched and processed external data using Axios for server-to-server communication.
- Proficient in designing and integrating RESTful APIs, OAuth APIs, JWT authentication, and OpenAI API integration.
- Proficient in relational databases, including MySQL and SQLite, with experience in database design and optimization.
- Proficient in manual and automation testing. APItesting using Postman and test automation using Selenium.
- Proficient in writing comprehensive technical documentation, including Software Requirements Specifications (SRS) and Software Design Documents (SDD).

SKILLS

C | C++ | Java | JavaScript | TypeScript | Python | PHP
MySQL | SQLite | OOP | Node.js, Express.js | Axios | React

Java / Python automation | Selenium | CI/CD Pipelines

Contest Programming | Problem Solving | Data Structure
Django | Spring Boot | HTML, CSS, Bootstrap etc

Data Visualization | Matplotlib, Seaborn, NumPy, Pandas, SKLearn
Machine Learning | Deep Learning | Android App Developing

TOOLS

Jira, Trello | GitHub | MySQL / PostgreSQL

PROJECTS

Project 1

Responsive E-commerce Website (Online Store)

4 months

- Developed using PHP, JavaScript, CSS, and SQL to enable smooth buying and selling of products. Supports dual login for admins (manage inventory/orders) and users (browse, cart, purchase). Features include categorized product listings with search and filter options. Secure checkout is integrated with PayPal for seamless online transactions.

https://github.com/sumayyaDev/Pjoject$_{P}HP - CSS - JS$

Project 2

Online Examination System (Digital Classroom)

4 months

- Developed using Django and SQLite, this platform offers a digital learning experience similar to Google Classroom. Teachers manage courses, upload materials, and schedule MCQ-based exams with time limits. Students can enroll, access resources, and take timed tests through a dedicated portal. The system auto-submits exams and provides instant grading and feedback.

https://github.com/sumayyaDev/LearnUp

Project 3

Comparative Method Analysis of Epidemic Spread Prediction using machine learning (Model Used – Linear Regression, ARIMA, SIR, SEIR)

10 months

- This project explores machine learning approaches to enhance early and accurate outbreak prediction. It analyzes and compares models like SIR, SEIR, ARIMA, and Linear Regression. Each model is evaluated based on its ability to forecast COVID-19 infection trends. The goal is to improve public health response through better predictive accuracy.

Project 4

Exploring Diffusing Model for Agricultural Crop Images and Comparative analysis with CNN and VGG-16

8 months

- This project explored the application of diffusion models for agricultural crop image analysis and to perform a comprehensive comparative evaluation with VGG16 and CNNs. Developing and implementing diffusion models, VGG16, and CNNs for the same agricultural crop image dataset. Conducting a detailed statistical analysis to compare the performance of the three models based on metrics such as accuracy, precision, recall, and computational efficiency.

Project 5

Paris Olympics 2024 Information and Management System

4 months

- Developed using Python and MySQL, this system manages event data, athlete profiles, medal standings, and ticketing. It offers real-time updates and user dashboards for spectators, athletes, and organizers. Includes modules like an admin panel, dynamic medal table, and personalized notifications. Ensures secure, scalable, and accessible interaction for all users.

CURRENTLY LEARNING

Node.js | Next.js | React.js | Agentic AI

SPECIAL COURSES

Machine Learning
University Elective Course

Pattern Recognition and Neural Network
University Elective Course

Selenium WebDriver: Selenium Automation Testing with Java
Udemy Online Course

freeCodeCamp Data Science and Machine Learning Bootcamp
Data Analysis with Python (Numpy, Pandas, Matplotlib, Seaborn)

Software engineering
University Elective Course

Artificial Intelligence
University Elective Course

CONTEST PROGRAMMING

Dhaka ICPC Preliminary 2021

Code Samurai 2022
Inter-University-Hachathon

NSUPS Bootcamp Prorgamming Contest
2021-2022

Online Judges
Weekly contest Programming in Vjudge, Hackerrank, Codeforces

EDUCATION

BS

North South University

2020-2024 | Dhaka, Bangladesh

- Bachelor of Science in Computer Science Engineering
- CGPA : 3.24

HSC

Uttara High School & College

2018 | Uttara

- Science

MOST PROUD OF

Leadership
Ability to Lead and guide the teammates while working in a team

Presentation Skill
Excellent Presentation, Communication, and Documentation skill

Can Do Attitude
I may initially have no idea about a task of which I am assigned to, but I am a quick learner. Once I am assigned, I make it done within due time

LANGUAGES

English

Bangla

LEISURE ACTIVITIES

- Reading Novels
- Watching Movies
- Exploring Nature & Wildlife
- Learning new Technologies
